

QUICK SPEEDS. QUALITY RESULTS.

The new Canon varioPRINT iX

FULL PERSONALIZATION

The Canon varioPRINT is 100% variable. Each piece can be completely unique and include targeted maps, personalized recommendations, tailored photography, financial offers, and other variable content.

FAST RESULTS & REMARKABLE QUALITY

The quality and consistency of offset with the speed and flexibility of digital. The Canon varioPRINT is over three times faster than a traditional cutsheet toner press and showcases stunning image quality with consistent, vibrant colors including smooth skin tones and incredible shadow detail.

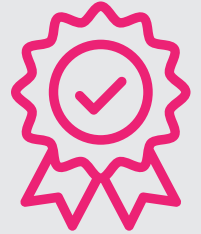

PAPER VERSATILITY

Print on uncoated, coated or synthetic substrates - no need for inkjet treated papers, which tend to cost 20-30% more than untreated stock. The Canon varioPRINT also reduces waste with on-demand printing options, uses water-based inks, and has no VOC emissions making it environmentally friendly.

THE PERFECT PAIR

The perfect complement to our HP T250, the Canon varioPRINT makes low to mid-range volume, highly variable jobs possible while delivering fast, high-quality results making it ideal for print-on-demand projects.

IDEAL QUANTITIES
